I favor the following:

- 1) first-to-invent
- 2) useful arts
- 4) do not require 'technical fields'
- 5) OK with 'unity of inventions'
- 6) utility of invention
- 9) grace period!!!
- 13) obviousness is already sometimes too strict in USA
- 14) no restriction on multiple claims
- 15) Keep stricter interpretation of claims
- 16) keep broad 'Doctrine of Equivalents'
- 17) keep personal names

Thank you.
